

HOW TO ACCESS DATA FROM THE MLS GRID

BROKER ACCESS GUIDE

The MLS Grid provides a single, standardized API data feed from participating MLSs to registered software vendors. Follow the steps below to create your vendor account and sign a data license agreement between the brokerages you work with, participating MLSs, and your company.

1. REGISTER ONLINE

- Go to www.mlsgrid.com and select "Vendor Access: Set Up My Account"
- Fill-in the required information, including contact information for the person that will be executing the data license on behalf of your company

2. ONBOARDING CALL TO FINALIZE ACCOUNT

- The MLS Grid will contact you to schedule an onboarding call to review the technical specifications for the API, payment details, and sign the Master Data IDX Licensing Agreement to finalize your account

3. ADD BROKERAGE & MLSs

- In your online account, enter the contact information for your broker customers and select their MLSs
- The MLS Grid will coordinate the data license agreement between your broker customers and their MLS
- You will receive an email notification to set up payment for each finalized agreement

4. BEGIN USING THE API

- After your payment has been received, you will be given access to generate an API token/key
