

MLS-Touch

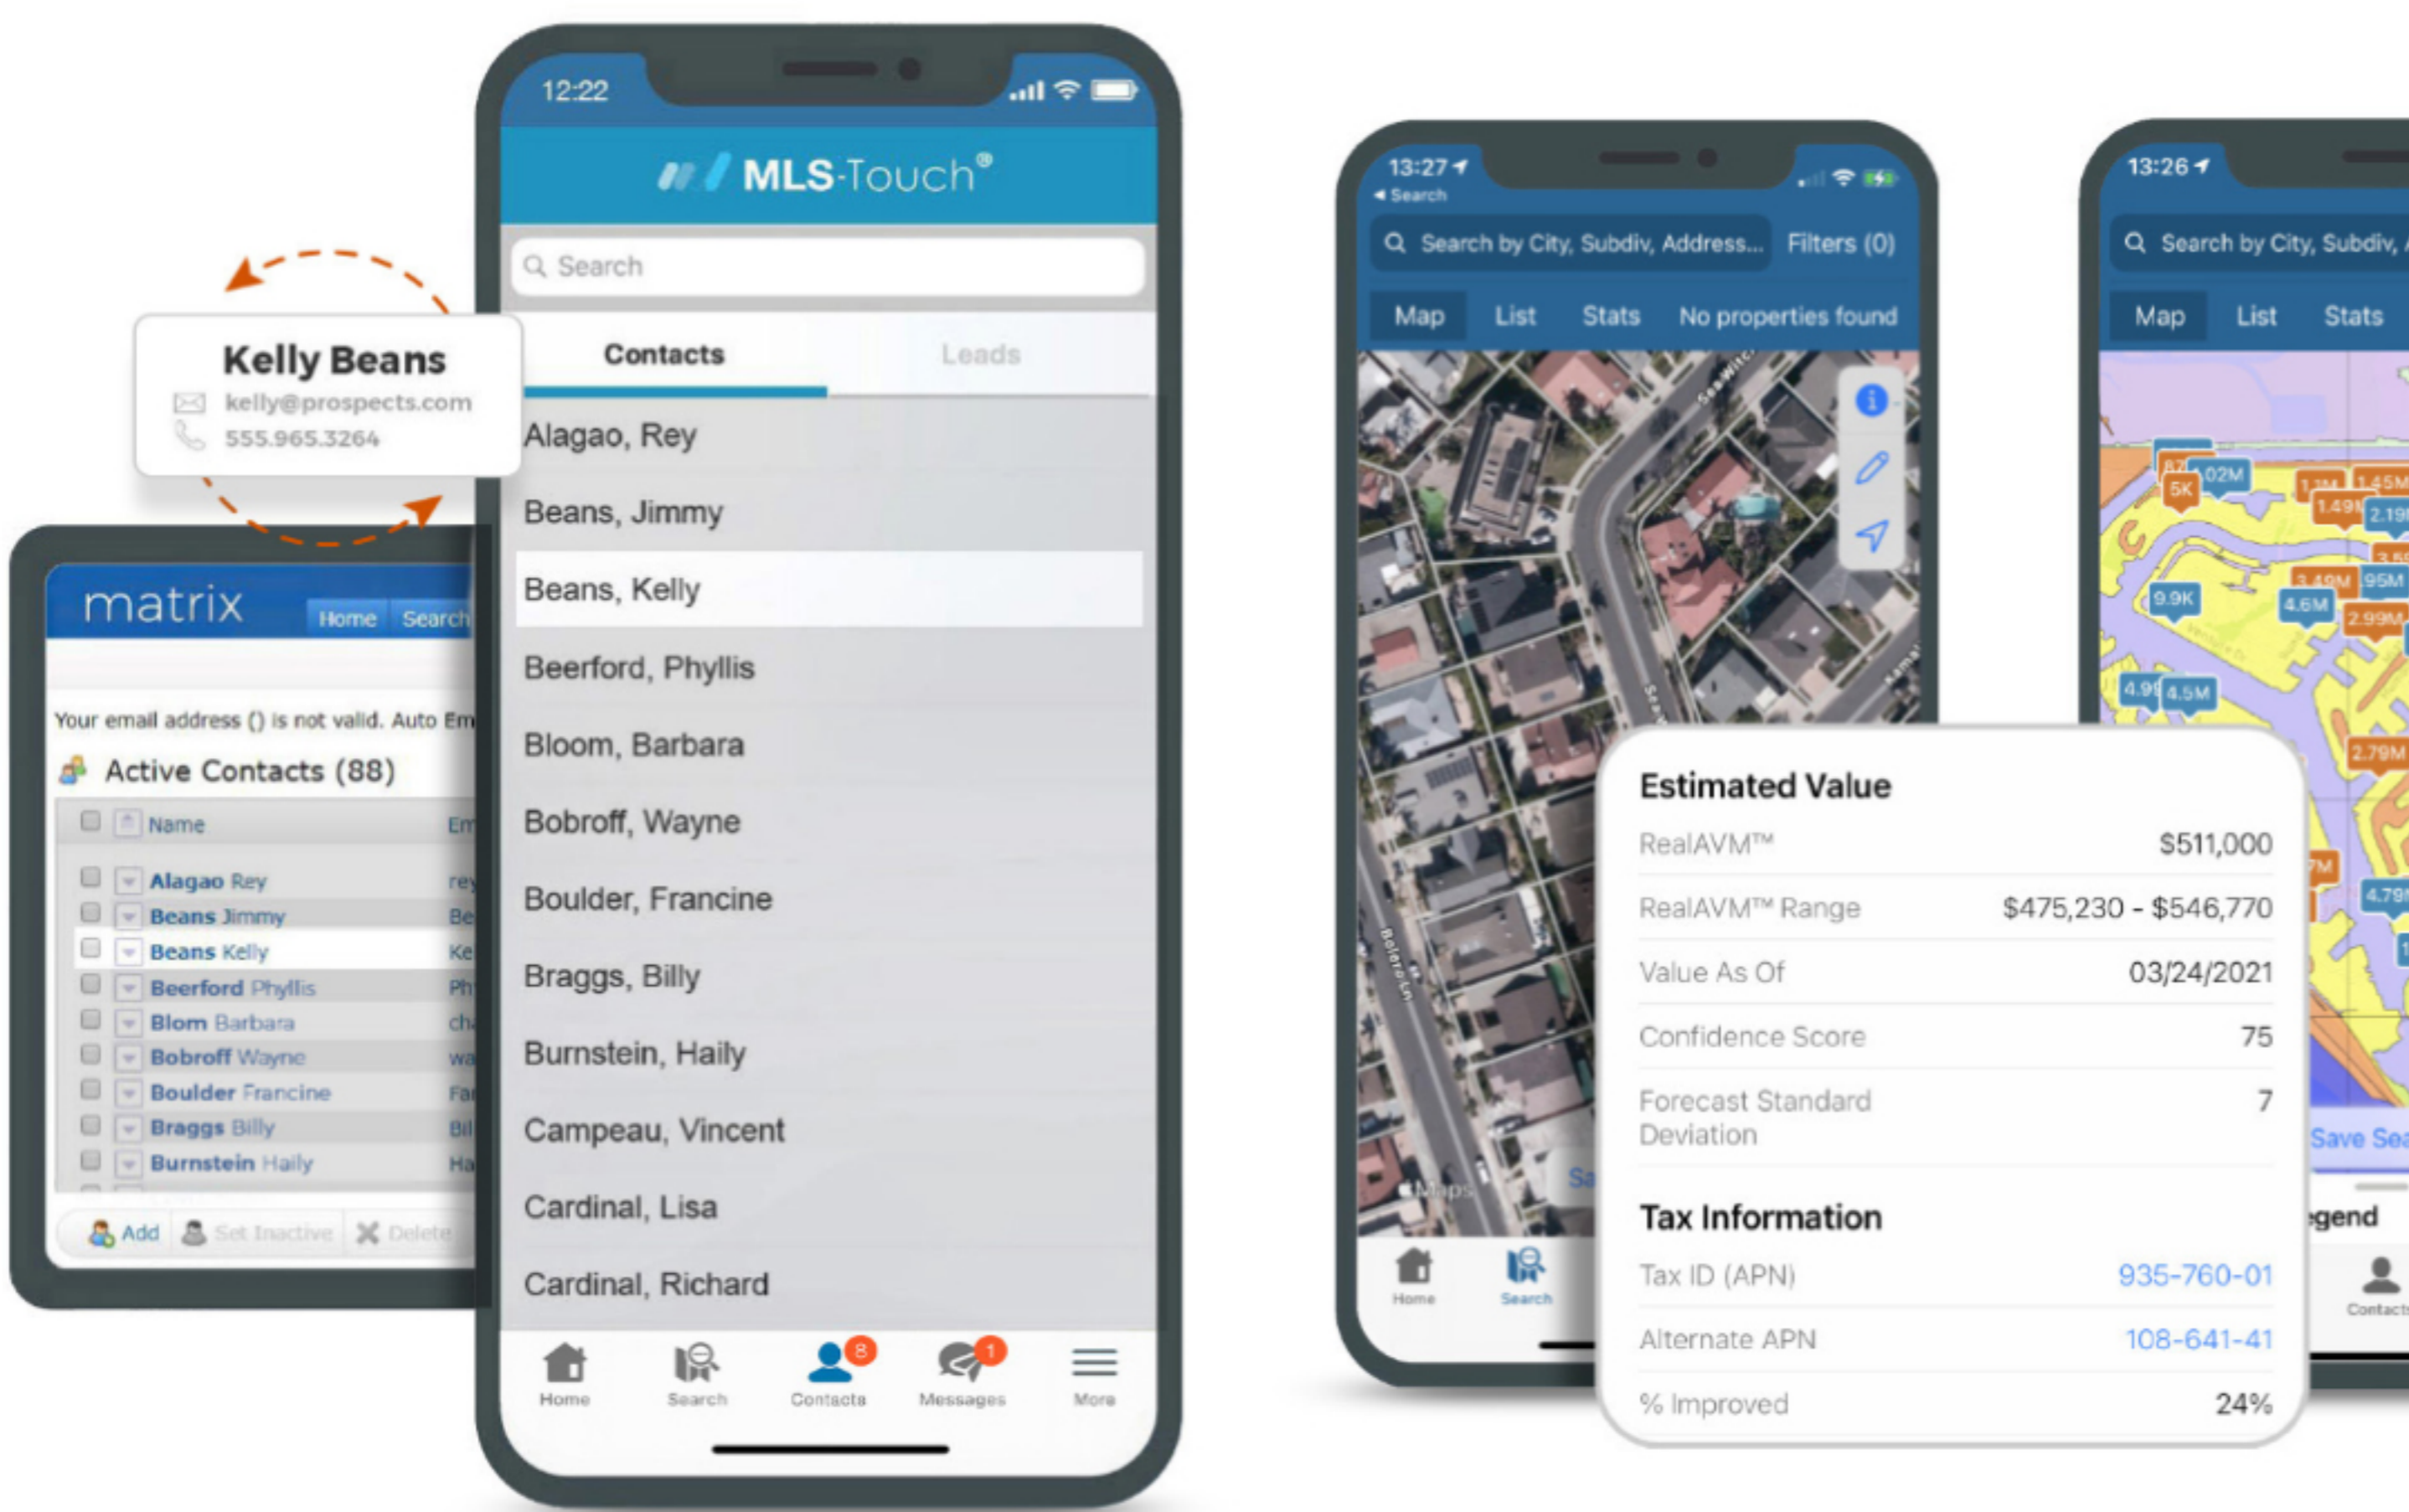

Connected and engaged on the go

Deals are made on the road. MLS-Touch is a premium mobile app by Prospects Software that keeps you connected to listings and engaged with leads and clients from wherever you are.

Integrated with Matrix™, Client Portal and Realist®

Seamless integrations ensure your most important client data is always at your fingertips. Contacts, favorites, sent listings, carts, and saved searches automatically sync with MLS-Touch.

CoreLogic property insights are also just a tap away including parcel boundary lines, tax and ownership/occupancy details, property Sell Scores, AVM data, flood zone data, and much more.

“ MLS-Touch is my favorite real estate app; it has been since I first discovered it 10 years ago! It is so intuitive, quick and easy-to-use, I use it as much as the actual MLS. It keeps all the data I need – listing data, tax data, agent contact info – right at my fingertips. I also love InstaView! Just point and tap, and you get all the details on nearby properties. I love sharing the app with my clients so they can benefit from it as well! In my opinion it is the best public facing real estate search portal out there with the added benefit of being branded to me. ”
