Clickable Map Layers 3

Add Team Name and Team License # to My
Information 5

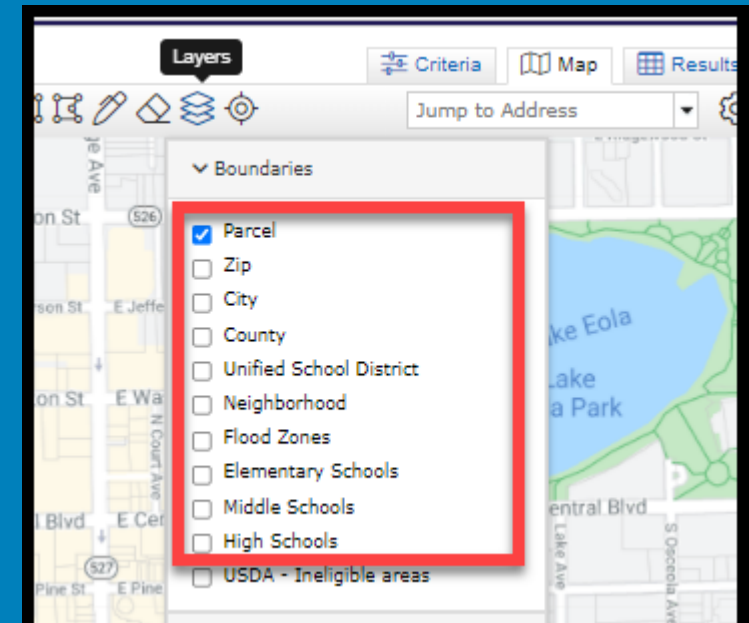

Clickable Map Layers

Benefits

Agents can now add specific map criteria to their searches. Agents can apply a map layer to their map search and then click to apply the shape of a specific map layer to their search (i.e., flood zones, schools, etc...).

Restrictions

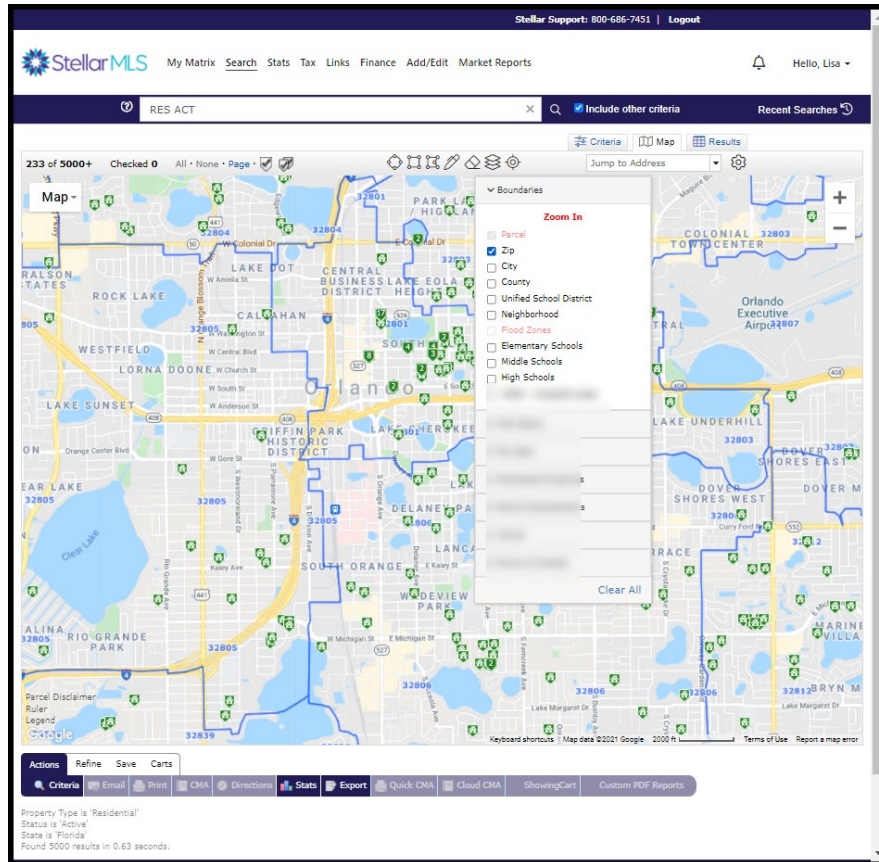

- Only applicable to the Boundary Layers from Parcel - High Schools.
- Cannot be used with Custom Map Layers.

Clickable Map Layers (Continued)

Previous

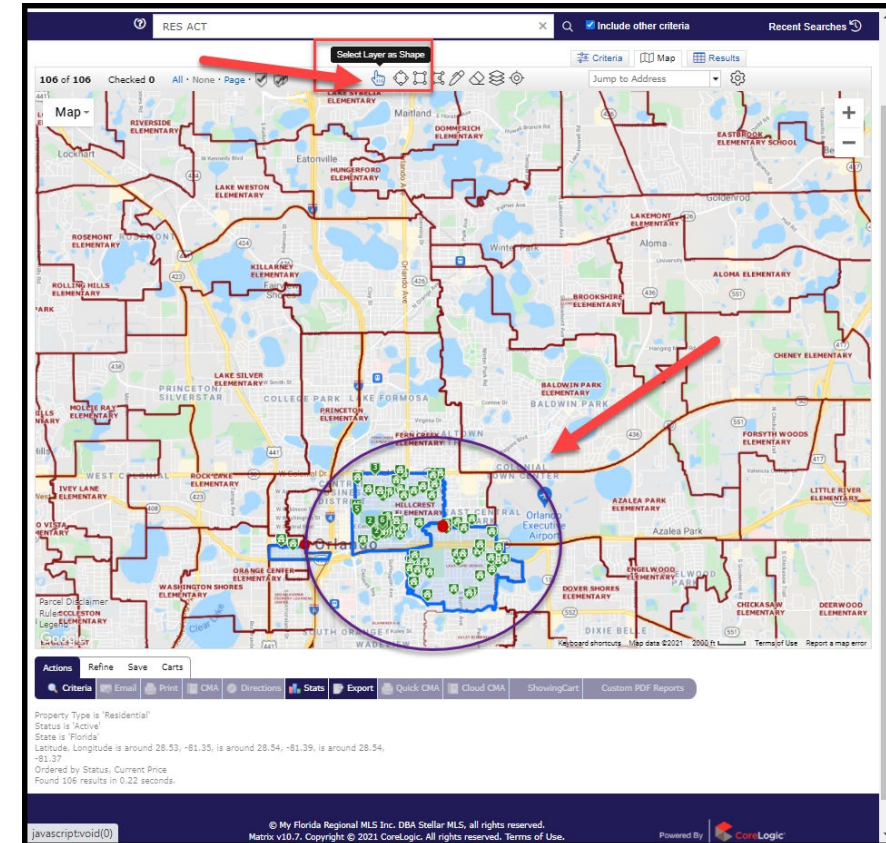

Previously, when you selected a map layer and wanted to search by boundaries, you would have to trace over that layer with the polygon tool.

Current*

Now, you can click on the small hand in the menu and then click the boundary you wish to apply to your search.

The little hand will appear only after a map layer is selected.

***Applied the area of two specific Elementary schools.**

Add Team Name and Team License # to My Information

Why we added these fields?

This field is on the My Information page in Matrix. This will display in OneHome.
