

## MLS-Touch Releases Two Display Enhancements!

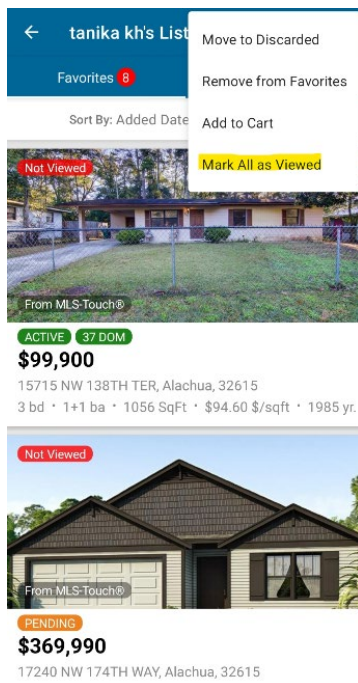

Included in your Stellar MLS product suite, [MLS-Touch](#) is a mobile app that works hand in hand with Matrix™ and [Prospects CRM](#). This means you can access your contacts, saved searches, and your clients' favorites altogether right from the app. MLS-Touch has released its latest update with not one but two **display enhancements** to make your MLS mobile experience more streamlined.

### Updated Display and Navigation

- Listing photos are larger, and more prominent.
- Information is easier to read.
- A label indicating the origin of contacts' favorite and sent listings.

*Please note, there is an option in the **Preferences** to revert to the previous display, if you'd prefer.*

#### IOS

#### Android

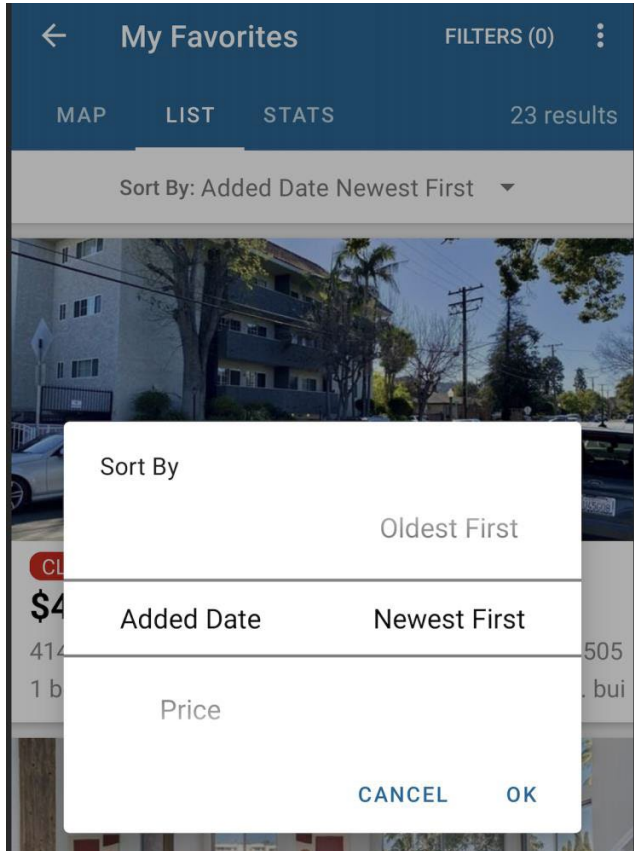

### Additional Sorting Options

Under the Preferences tab, "Added Date" is now the default sort option for the following lists:

- Contacts Favorites
- Sent List
- My Favorites

Download the MLS-Touch app and sign in with your Stellar MLS account information to get started today!
