

# TransactionDesk Enhancements

February 8, 2023

## Transaction list filters

Added an indicator to the Owners filter in the Transaction list page, and the Sort filter has been updated to display the current selection in the Transaction list page and the Office Transactions list page.

Now you can easily locate the transaction you need.

## Agent list improvements

Added a Remove option to the more options dropdown in the Agent list page in Broker Tools, (available for super users).

Now you can delete an agent from your office, without deactivating the agent's account.

For more information on this enhancement, see [“Delete an Agent \(TransactionDesk Edition\)”](#).
